### ATEN EA1441

Indukční snímač (Inductive Sensor) pro napájecí jednotky (PDU)

For the security of your data center, ATEN provides Inductive Proximity Door sensor probes that work in tandem with the Power Distribution Units, which allows the monitoring of a rack mounted enclosure's door access, notifying users when a door has been opened. Various conditions can be monitored with alarms according to customizable minimum/maximum settings. \* The Sensor is an optional accessory and you can use the ATEN PDU without the door sensors. However, if you want to have complete security management of your data center with the full use of ATEN solutions, a sensor installation is required. \*\*Support PE7/PE8/PE9 series only The Inductive Proximity Door Sensor allows the monitoring of a rack mounted enclosure's door access – notifying users when a door has been opened

High sensitivity

Easy operation
