ATEN KM0032-AX-G

maticový KVM přepínač - 32-portová rozšiřující jednotka
určeno jen pro rozšíření MATRIX KVM přepínačů o další porty
redundantní napájení
lze dát do 19" racku (1U)

ATEN Matrix KVM Switches are designed for modern data centers that require reliable, high security access and control of multiple servers. With non-blocked access and flexible expansion support, Matrix KVM switches offer high quality video sessions for secure, real-time control of your entire data center devices. With automatic skew compensation and Auto Signal Compensation (ASC) techniques, Matrix KVM switches provide greatly enhanced video quality via Cat 5e/6 cabling - 1280x1024 @60Hz for up to 300 meters. The industry's first full screen Graphical User Interface offers a tree view list of installed devices - providing smooth navigation and convenient access and control - not only saving on training time and costs; but increasing user efficiency, as well.
